

# HELP!

We need your help. **Lunken Airport Career Days** is scheduled for **September 8 & 9** and we need to start planning our participation for this year. I would like to increase our participation and increase an aviation maintenance presence this year.

1. If you are a corporate technician, please consider using your company aircraft as a static display. This doesn't have to be a turbine airplane but any type of aircraft.
2. We would like to set up various stations where different aspects of our careers can be explained. Inspection, hydraulics, sheet metal, composites, engine maintenance, interior completions (woodwork and fabric) and electronics are several examples. It would also be nice to share other careers in the maintenance field such as repair stations (Aero Battery is a great example), line service, and aircraft cleaning (Apex Aircraft Detailing is also a great example).
3. We also have several hands-on projects that we could have spectators participate in but we will need volunteers to help work the stations. There is a sheet metal project, an electronics project, and an aircraft reciprocating engine that can be used for show and tell.
4. There is also a need for volunteers to help manage the ramp.
5. We could also have an OATS booth. OATS members could explain what an aircraft technician does and how to become a technician. We could also have a question and answer session.

I am also open to other ideas but we need to start now and we need volunteers. You don't need to volunteer for both days or for the entire time but please volunteer some time. **We cannot make this work without you.** Let's show the general public and the younger generation what aviation maintenance is about and that we are proud to be a part of it.

Please contact me at [gary.goodpaster@kroger.com](mailto:gary.goodpaster@kroger.com) or 513-484-9258 (please leave a message if I do not answer) if you are interested in volunteering and sharing your passion for aviation.

**. Lunken Airport Career Days - - - September 8 & 9**
